Please provide a substantive review of this software below.

MileIQ runs in the background on your phone and keeps track of your mileage. You go in after the fact and swipe one way to indicate the trip was personal and the other way to indicate the trip was for business. I do this when I'm waiting in line or use the web interface to do it on the dashboard. At the end of every month, I print a list of all my business trips, write notes in the margins about the purpose of the trips, and give the printout to my bookkeeper to update my general ledger with my mileage expense. It costs $59.99 a year and is an incredibly easy way to keep track of business miles.
